

Hong Kong International Photo Festival launches online interactive platform ‘Past The Horizon’

PAST THE HORIZON is an interactive online platform built to catalyse exchanges across the terrains of photography, sound and literature. As the final showcase of the Photographer Incubator mentorship programme initiated by the Hong Kong International Photo Festival in 2019, the site features over 300 original works by Taiwanese singer-songwriter Wang Yu-jun, local multimedia artist Steve Hui, poet Lau Yee Ching, photographer Lau Ching Ping, sound artist Kung Chi Shing, and 11 local image makers. The jumble of sound, words and images created via intensive workshops and dialogues spanning half a year are now presented as materials for members of the public to experiment and experience multimedia mixing and generate their very own one-minute video.

The platform also welcomes members of the public to EXPLORE the abundant body of work, CHANCE on a new narrative, CONTRIBUTE something of yours into the mix and watch it take on new meanings as it collides with other materials. Take on your journey now at <https://hkipf.space/>
